

To The U.S. Congress. The proposed bills to restrict satellite radio are not only unfair they are dangerous to free enterprise. The purchase of satellite radio is my descision and my money. I purchased two units and plan on another in the near future. I'm happy to pay to not listen to the never ending commercials. Please do not limit this growing technology. Satellite radio increases safety on the road, as there is no need to search of another radio station when traveling. I will contact my local Congressman and both Senators about my opposition to HR 4026. Thank You
